

**INTERNATIONAL SAFETY SYSTEMS INC.**

Your Source for Safety

## DO YOU COMPLY WITH THE LATEST SAFETY STANDARDS?

### FALL PROTECTION AND CONFINED SPACE ENTRY

All workers using fall arrest and restraint equipment need to be trained properly on use and maintenance of their brand and model of equipment. A proper orientation program must be in place and documented.

ISS will provide no charge product use and maintenance training (some conditions apply).

Know your anchor points and devices. The most common mistake made by workers is using the wrong equipment for the job and inadequate anchor points for fall arrest.

The supervisor and business owner can be held liable for not ensuring safe work practices are followed. Make sure you are documenting regular workplace inspections.

Working in any confined space demands precise calculations and careful consideration. Do you have a permit and written entry procedures? Do you have the right equipment?

Practicing rescues and keeping proper documents can ensure you are covered in the event something goes wrong.
