

INTERNATIONAL SAFETY SYSTEMS INC.

Your Source for Safety

DO YOU COMPLY WITH THE LATEST SAFETY STANDARDS?

INFLUENZA AND ONTARIO EMPLOYERS

How Does the Flu Spread?

- Breathing droplets that have been sneezed or coughed into the air by someone with the flu, or having the droplets land on the surface of your eye.
- Shaking hands with an infected person or touching a contaminated surface, and then touching your own eyes, nose, or mouth.

Having the means to control the spread of flu germs can dramatically reduce the number of employees absent from work due to illness.

Choosing the right product to help combat germs in your workplace can help minimize costs. There are many different way to distribute and dispense waterless hand sanitizer to all your employees. Let us explain all the options and help you make an informed decision.
