

INTERNATIONAL SAFETY SYSTEMS INC.

Your Source for Safety

DO YOU COMPLY WITH THE LATEST SAFETY STANDARDS?

HAZARDOUS LIQUID HANDLING AND STORAGE

The Ministry of the Environment and OFC require secondary containment for many chemicals. Do you use spill pallets? Not having proper containment can impact your insurance coverage in the event of a spill.

Most flammable liquids must be stored in UL listed or approved safety cabinets and be properly grounded when handling. If yours are not, your insurance may be affected if a fire occurs. Protect your assets.

Major spills must be contained quickly to reduce down time and potential fines. A proper spill kit is required by law and can save you *thousands* of dollars.
